

Greetings from New Zealand - the world of natural products!

New Zealand's geographic location in the middle of the South Pacific Ocean, thousands of kilometers away from highly populated regions of the world has contributed to an exceptional evolutionary development.

The country is blessed with a unique flora and fauna, which has developed independently and has produced some amazing creatures and plants. The natural environment has in many parts been preserved in its pristine state and awareness and commitment by its people will make sure that this gift from nature will be preserved in eternity.

New Zealand's natural environment is also a source for many unique products, which can not be found anywhere else in the world.

Nature Shop New Zealand is privileged to be able to offer some of them to consumers outside of New Zealand! We have carefully selected natural products, which meet strict environmental and sustainability criteria and are at the same time highly beneficial to consumers.

Bottled Spring Water

Local and international testing and analysis, has determined that Nature Shop New Zealand spring water is one of the finest and most pure in the world.

Spring water is organically filtered under great pressure by volcanic sediments rich in minerals for hundreds of years, resulting in naturally high levels of silica in colloidal form. Silica, a trace element and nature's stimulant for our immune system, changes the structure of the source spring water, creating enhanced, structured water with a natural PH level of 7.2.

Nutritional information: (mg/L)

Energy	nil
Fat	nil
Protein	nil
Carbohydrate	nil
Sodium	30
Magnesium	1.8
Calcium	7.24
Chloride	32
Nitrate	>0.05
Potassium	3.2
Silica	57.4
Total Dissolved solids	141
pH	7.2
Non carbonated	No preservatives
No additives	Sterilised by Ozonation
